General Comments

This report supersedes any previous report(s) with this reference. Results apply to the sample(s) as submitted. All pages of this report have been checked and approved for release.

When no sampling time is provided, the sampling time will default 00:00 on the date of sampling. If no sampling date is provided, the sampling date will be assumed by the laboratory and displayed in brackets without a time component.

This report shall not be reproduced except in full, without prior written approval from the laboratory.
The laboratory declares that the test results relate only to the items tested and do not substitute any other documents.
Laboratory is accredited by SNAS, that is signatory to the ILAC MRA for accreditation of Testing Laboratories.

The sampling was carried out by the employee of the TL for the applicant, the scope of the examination according to the applicant's request.
Parameter Salmonella sp. consists of strain: *Salmonella enterica spp. enterica* serovar *Enteritidis*.

Brief Method Summaries

Analytical Methods	Method Descriptions
B-LSPPD-E48	ŠPP MB-M-16 Carcass sampling, detection and enumeration of culturable microorganisms of the surfaces in the food chain environment
B-SALD-E48	ŠPP MB-M-16 Carcass sampling, detection and enumeration of culturable microorganisms of the surfaces in the food chain environment

Key: **LOR** = Limit of reporting represents the standard LOR for the respective parameters in each method. Note that limits of reporting may be affected if, e.g. additional dilution was required because of matrix effects, or the sample quantity was limited.; **MU** = Measurement Uncertainty; **ČSN** = Czech Technical Standard; **STN** = Slovak Technical Standard; **TL** = Testing laboratory; **SM** = Directive; **ŠPP, SOP** = Standard Operating Procedure; **AK** = accreditation key; **A** = accredited; **N** = not accredited; **SA** = subcontracted accredited; **SN** = subcontracted not accredited; **CFU** = Colony forming units

The uncertainty is given as extended uncertainty (according to the definition in "Guide to the Expression of Measurement", JCGM 100:2008 Corrected version 2010) calculated with a coverage factor of 2, which give level of approximately 95%. Measurement of uncertainty is reported only for detected substances with levels above the reporting limits.
The uncertainty from subcontractors is often given as extended uncertainty calculated with a coverage factor of 2. Contact the laboratory for further information.
